August 1st - Monsoonal moisture surged into southern and eastern Utah, with some thunderstorms producing heavy rain. Flash flooding occurred in several creeks and rivers, including the Escalante River, Kanab Creek, and Oak Creek. Heavy rain produced a large debris flow on the Seeley Burn Scar, which undercut Highway 31 near Huntington Creek. Up to 3 feet of debris spanned nearly a mile along the road. There was also a 5 foot wall of water in Pole Canyon and a logjam in Huntington Creek, which pushed a loader vehicle into a ditch.

Precipitation Totals (inches)

Wendover Peak	41	Pioneer Crossing	41	Grantsville	41

August 10th - Scattered showers and thunderstorms developed statewide, with heavy rain reported in portions of eastern and central Utah, and gusty winds elsewhere. Flash flooding occurred in several areas of Capitol Reef National Park, including Sulphur Creek, The Scenic Drive, and the road to Grand Wash. In Salt Lake City, severe thunderstorm winds knocked down a tree at a senior center, injuring one person.

Increased Chance of Thunderstorms Today

A disturbance crossing the Pacific Northwest will bring an enhanced chance of thunderstorms to most of the state today into tonight.

Impacts:

- Flash flooding possible especially in southern and eastern Utah including Zion National Park and Capitol Reef National Park
- Numerous lightning strikes, especially across northern Utah
- Gusty winds up to 50 mph and small hail

August 17th - Thunderstorms brought locally heavy rainfall to portions of central and southern Utah during the afternoon and evening. Several storms in southern Utah produced flash flooding. Rocks were washed onto Highway 14 east of Cedar City, closing the highway. In the town of Enoch, water flooded at least 2 dozen basements, and street flooding was reported. Zion National Park had flash flooding in Spry Canyon and Pine Creek, with rocks on the main road and Highway 9 between the switchbacks and the tunnel. Flash flooding occurred at the confluence of Cottonwood Creek and the Paria River, and there were several reports of flooding in Hildale.

Above right and Below: Homes (mainly basements), yards and roads were flooded as strong thunderstorms moved directly over the town of Enoch. Photos courtesy of Iron County Today.

Precipitation Totals (inches)

Kodachrome Basin S.P.	1.31	Monroe	0.74	Cedar City	0.72
Agua Canyon	0.30	Zion Canyon	0.30	Milford	0.29
Beaver Portable #1	0.17	Greenville Bench	0.16	Lava Point	0.12
Kanab	0.10	Buck Flat	0.10	Pine Valley	0.05

August 19th - Heavy downpours once again produced flash flooding in portions of southern Utah. A large flash flood was observed along the Paria River, where it was estimated the first 200 to 300 yards of the flood was composed of debris, including trees and logs. Flash flooding in Zion National Park stranded 22 people overnight in the Subway section of the park , and 2 people overnight in Behunin Canyon. There was also significant flooding in Keyhole and Pine Creek Canyons.

Precipitation Totals (inches)

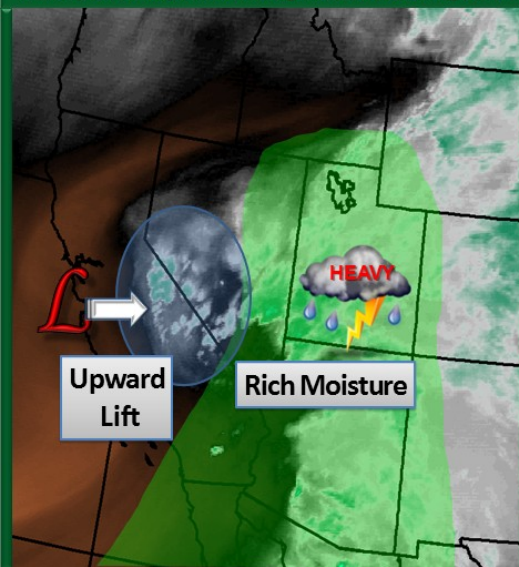

Kanab	1.02	Assay	0.50	Zion National Park	0.47
Pine Valley	0.46	Zion Canyon	0.46	Fishlake Port #2	0.37
Beaver Portable #1	0.24	White Reef	0.08	Telegraph Flat	0.08
Buck Flat	0.08	Milford	0.05	Junction	0.05

August 21st - An isolated thunderstorm in Beaver County produced a small (EF0) tornado near the Nevada state line. The Beaver County sheriff reported the tornado was about 33 miles NW of Beryl.

August 22nd-23rd - Monsoonal moisture increased statewide, setting up a rich environment for very heavy rain and flash flooding, mainly across central and southern Utah. And indeed flooding did occur, at least on the 23rd, with major flash flooding reported in Coyote Creek, which is a tributary of the Wahweap drainage near Big Water in Kane County. Large trees and debris lead the flood on the first wave. Flash flooding was also reported in Capitol Reef National Park, including Sulphur Creek. And back in Kane County, another large flash flood occurred in the Buckskin Gulch area near State Route 89. Multiple roads were closed in Kane County on the 23rd due to flash flooding, including Smokey Mountain Road, Nipple Creek Road in the Wahweap Drainage, Houserock Road in the Buckskin Drainage, and Cottonwood Road near Kodachrome State Park.

Widespread Heavy Rainfall through Tomorrow Evening for Central and Southern Utah

A storm system over central California will approach and cross southern Utah through tomorrow evening.

Widespread heavy rainfall is expected for central and southern Utah due to the combination of moisture, and approaching upward lift associated with the arrival of the storm system.

Northern Utah will see less thunderstorm coverage.

Flash flood prone areas including slot canyons, normally dry washes, and recent burn scars are especially threatened. There is also a threat of mainstem river flooding and other urban and debris flow issues mainly south of Interstate 70.

Thunderstorms This Afternoon

Storms will develop this afternoon across central and southern Utah.

Main Threat

Heavy rain will bring the potential for flash flooding in slot canyons, dry washes, and near burn scars.

Coverage

Storms will develop over central and southern Utah, shaded in green. The heaviest rain will be across SE Utah

Here's a look at Record Temperatures set for the month of August:

 **Aug 6th** - Ferron tied a record high minimum temperature for the date with 66 (66/2001).

Aug 8th - Salt Lake Int'l Airport tied a record high maximum for the date with 103 (103/1990), along with Bountiful-Val Verda 100 (96/2001), and Ferron 94 (94/2000).

Aug 9th - Ferron set a record high minimum temperature for the date with 68 (66/1960).

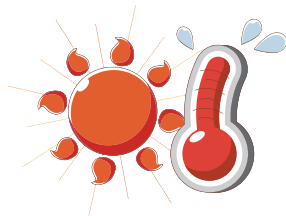

Aug 20th - Four spots broke their record high minimums...Duchesne 65 (65/1961), Hanksville 74 (72/2008), Price 72 (65/2001), and Provo BYU 70 (66/2002).

 **Aug 22nd** - Ferron set a record high minimum temperature for the date with 66 (64/1991).

Aug 28th - Four locations set new record high maximums...Provo BYU 98 (98/2001), Salt Lake Int'l Airport 98 (97/1961), Utah Test Range 97 (96/2001), and Wendover 97 (96/1969). Provo BYU also set a record low minimum with 65 (64/2000).

 **Aug 29th** - Six more spots set new record high minimums...Alpine 64 (62/1997), Grantsville 74 (65/2007), Laketown 58 (58/1922), Provo BYU 66 (66/2001). Salt Lake Int'l Airport 75 (72/1883). and Utah Test Range 58 (56/1898).

Aug 30th - Three locations set new record high minimums...Duchesne 58 (58/2000), Milford 66 (64/1999), and Salt Lake Nat'l Airport 71 (70/2001).

August 2012 turned out to be the warmest August on record in Salt Lake City. The mean temperature of 81.7 degrees broke the previous record of 80.8 degrees in 1994.

June, July, & August 2012 also combined to give Salt Lake City the 2nd warmest summer on record with a mean temperature of 79.2 degrees. The record is 79.3 set in 2007.
